### RISK TO INVESTORS

#### I. Risk to Investors: Top 10 risk factors

- Our company may be adversely affected by our dependence on IT Supplies, exposure to price volatility, and the absence of long-term supply contracts.
- We do not own the premises in which our registered office is located and the same are on lease arrangement. Any termination of such lease/ license and/ or non-renewal thereof and attachment by Property Owner could adversely affect our operations.
- Inability to effectively manage inventory levels and fluctuations in prices of key components used in the refurbishment process may increase our operational costs and adversely impact our business, profitability and cash flows.
- Our Company's business model is highly dependent on a reliable and efficient supply chain for the procurement of used laptops, components and other materials necessary for the refurbishment process. Any disruption in this supply chain may have a significant negative impact on the Company's operations, production schedules, and financial performance.
- We may not be able to successfully manage the growth of our business if we are unable to maintain adequate internal systems, processes and controls.
- Our policy of providing product warranties exposes us to potential costs associated with returns, replacements, and disputes, which may adversely affect our profitability and operational results.
- If we are unable to maintain and enhance our brand and reputation, the sales of our services may suffer which would have a material adverse effect on our business operations.
- Our failure to achieve adequate sales from our stores could adversely affect our business and results of operations.
- Our business is labour-intensive, and any disruption due to workforce-related issues such as strikes, attrition, or rising wage pressures could adversely affect our operations, costs, and financial performance.
- Our business is working capital intensive, and any shortfall in meeting our working capital requirements may adversely impact our operations, growth plans, and financial condition.

### RISK TO INVESTORS

#### I. Risk to Investors: Top 10 risk factors

- Our company may be adversely affected by our dependence on IT Supplies, exposure to price volatility, and the absence of long-term supply contracts.
- We do not own the premises in which our registered office is located and the same are on lease arrangement. Any termination of such lease/ license and/ or non-renewal thereof and attachment by Property Owner could adversely affect our operations.
- Inability to effectively manage inventory levels and fluctuations in prices of key components used in the refurbishment process may increase our operational costs and adversely impact our business, profitability and cash flows.
- Our Company's business model is highly dependent on a reliable and efficient supply chain for the procurement of used laptops, components and other materials necessary for the refurbishment process. Any disruption in this supply chain may have a significant negative impact on the Company's operations, production schedules, and financial performance.
- We may not be able to successfully manage the growth of our business if we are unable to maintain adequate internal systems, processes and controls.
- Our policy of providing product warranties exposes us to potential costs associated with returns, replacements, and disputes, which may adversely affect our profitability and operational results.
- If we are unable to maintain and enhance our brand and reputation, the sales of our services may suffer which would have a material adverse effect on our business operations.
- Our failure to achieve adequate sales from our stores could adversely affect our business and results of operations.
- Our business is labour-intensive, and any disruption due to workforce-related issues such as strikes, attrition, or rising wage pressures could adversely affect our operations, costs, and financial performance.
- Our business is working capital intensive, and any shortfall in meeting our working capital requirements may adversely impact our operations, growth plans, and financial condition.

- Our company may be adversely affected by our dependence on IT Supplies, exposure to price volatility, and the absence of long-term supply contracts.
- We do not own the premises in which our registered office is located and the same are on lease arrangement. Any termination of such lease/ license and/ or non-renewal thereof and attachment by Property Owner could adversely affect our operations.

- Our Company's business model is highly dependent on a reliable and efficient supply chain for the procurement of used laptops, components and other materials necessary for the refurbishment process. Any disruption in this supply chain may have a significant negative impact on the Company's operations, production schedules, and financial performance.
- We may not be able to successfully manage the growth of our business if we are unable to maintain adequate internal systems, processes and controls.
- Our policy of providing product warranties exposes us to potential costs associated with returns, replacements, and disputes, which may adversely affect our profitability and operational results.
- If we are unable to maintain and enhance our brand and reputation, the sales of our services may suffer which would have a material adverse effect on our business operations.
- Our failure to achieve adequate sales from our stores could adversely affect our business and results of operations.

- Our business is working capital intensive, and any shortfall in meeting our working capital requirements may adversely impact our operations, growth plans, and financial condition.
